## **MATERIALS RESEARCH BULLETIN**

**Editor-in-Chief: Heinz K. Henisch, Materials Research Laboratory, The Pennsylvania State University, University Park, PA 16802, USA**

(00313)

Subscription Rate 1994: Volume 29 (12 issues) £455.00 (US\$700.00)

ISSN 0025-5408

**Audience:** Materials Scientists, Ceramists.

### **AIMS AND SCOPE**

The *Materials Research Bulletin* is an international rapid publication journal reporting research on crystal growth, materials preparation and characterization. It deals with the structure and properties of electronically, optically or mechanically interesting solids considered and discussed specifically as a function of the preparational parameters. It covers such topics as the synthesis of new phases, high pressure and high temperature phase changes, crystal growth mechanisms and techniques, defect structure analysis, the preparation and structure of non-crystalline solids and composite materials.

## **PROGRESS IN SOLID STATE CHEMISTRY**

**An International Review Journal**

**Editors:** Gerd M. Rosenblatt, *Lawrence Berkeley Laboratory, Materials Science Division, University of California, Berkeley, CA 94720, USA* and Wayne L. Worrell, *School of Engineering & Applied Science, Office of Graduate Education & Research, University of Pennsylvania, 119 Towne Building, Philadelphia, PA 19104, USA*

(00417)

Subscription price 1994: Volume 23 (in 4 issues) £214.00 (US\$330.00)

ISSN 0079-6786

**Audience:** Chemists, Materials Scientists, Physicists, Metallurgists, Crystallographers, Ceramists, and Engineers interested in the solid state.

### **AIMS AND SCOPE**

*Progress in Solid State Chemistry* presents a chemical view of the solid state by providing up-to-date critical reviews written by acknowledged authorities in the field. It also publishes surveys of research progress and specialized articles devoted to summarizing particular recent developments. The aim is to address the need brought about by the literature on the chemistry of the solid state being widely dispersed, making it difficult to obtain a broad and unified assessment of the present state of knowledge. Special emphasis is given to relating physical properties and structural chemistry. Whereas structural chemistry at one time was concerned mostly with perfect solids, most activity focused upon understanding of solid properties focuses on imperfections. Entities such as vacancies, dislocations, and positive holes, which have no independent existence outside the solid itself, are of prime importance in modern solid state chemistry. The reviews published in *Progress in Solid State Chemistry* emphasize critical evaluation of the field, along with indications of current problems and future directions. Papers are not intended to be bibliographic in nature but rather to inform a broad range of readers in an inherently multidisciplinary field by providing expert treatises oriented both towards specialists in different areas of the solid state and towards nonspecialists. The authorship is international, and the subject matter will be of interest to chemists, materials scientists, physicists, metallurgists, crystallographers, ceramists, and engineers interested in the solid state.

# Announcing New and Newly Acquired Journals

## Engineering

### Control Engineering Practice

1994: Volume 2 (6 issues)

Publishes papers which illustrate the direct application of control theory and its supporting tools in all possible areas of automation. The journal is centred in engineering - especially mechanical, electrical and electronic, aerospace and chemical engineering, but also includes social effects, cultural aspects, project planning and system design and economic and management decisions.

### Engineering Failure Analysis

1994: Volume 1 (4 issues)

Publishes original, high quality research papers, communications, and occasional review articles describing the analysis of engineering failures and related studies.

It provides essential reference material and critical feedback into design process thereby contributing to the prevention of engineering failures in the future.

## Chemistry

### Bioorganic & Medicinal Chemistry

A Tetrahedron Publication

1994: Volume 2 (12 issues)

Provides an international forum for the publication of full original research papers and critical reviews on molecular interactions in key biological targets such as receptors, channels, enzymes, nucleotides, lipids and saccharides. The aim of the journal is to promote a better understanding at the molecular level of life processes, and living organisms, as well as the interaction of chemical agents with these.

## Molecular Biology

### Cytokine Reviews and Communications

1994: Volume 1 (4 issues)

This new international journal will publish both authoritative reviews and short preliminary communications in the growing field of cytokine research. Articles will focus on all aspects of cytokine research, including cytokine discovery, functional studies, and genetic and molecular experimentation.

Free sample copies of these journals are/or will be available on publication, from your nearest Elsevier Science office

## Social & Behavioural Sciences

### European Management Journal

1994: Volume 12 (4 issues)

Publishes leading-edge research from academics and senior industrialists throughout Europe and the United States enabling practitioners and management trainers to broaden their knowledge of the new operational environment.

### International Business Review

1994: Volume 3 (4 issues)

This journal provides a forum for academics and professionals to share the latest developments and advances in knowledge and practice of international business. It aims to foster the exchange of ideas on a range of important international subjects and provide stimulus for research and the further development of international perspectives.

### International Transactions in Operational Research

1994: Volume 1 (4 issues)

The primary purpose of this journal is to advance the understanding and practice of operational research on an international basis. The scope of the journal will include problems of an international nature (e.g. fisheries management, environmental, global competitiveness).

### Location Science

1994: Volume 2 (4 issues)

The primary focus of this journal is on research directed to extending and applying the theory and modeling of location decisions. The journal will also publish papers which address the underlying processes related to locational decisions, the determination of parameters associated with location problems, and issues of implementation.

### Transportation Research Part C: Emerging Technologies

1994: Volume 2 (4 issues)

This journal is concerned with the impacts of new technology (including IVHS) on transportation system performance characteristics.

## Environmental Science & Technology

### Spill Science and Technology Bulletin

*Sister Journal of Marine Pollution Bulletin*

1994: Volume 1 (2 issues)

A new international, peer-reviewed journal on oil and chemical spill science and technology, focussing on the effects and control of discharges of oil, oil products and other hazardous substances. Both land and water spill issues will be addressed, and papers linking science and technology with policy and management matters will also be considered appropriate.
